Education

Simon Fraser University Expected Graduation – Apr. 2027
Bachelor of Science in Computer Science *Burnaby, BC*

- Relevant Coursework: Data Structures and Algorithms, Full stack Development, Intro to AI, Database Systems.

Experience

Software Developer Intern Sep. 2023 – Apr. 2024
CJSF *Burnaby, BC*

- Built and enhanced **UI components** for **cjsf.ca** using **React** and **Node.js**, improving page load performance by approximately **25%** through frontend optimization and more efficient client-server data handling.
- Integrated and validated **REST APIs** to power dynamic content delivery, reducing manual content update time by roughly **30%**.
- Implemented basic **Jest** unit tests, **debugged UI and functionality issues**, and used structured testing practices to support stable releases across desktop and mobile browsers.
- Collaborated in a **GitLab** based workflow, contributing code changes, supporting reviews, and working with **Docker** and **CI/CD pipelines** to help test and deploy updates reliably.

Projects

SmartGrab | *Flutter, Dart, Kotlin, Firebase* Jan. 2026 – present

- Developed **SmartGrab**, an Android decision support app for gig workers, used by **200+ users** to deliver real time order recommendations for DoorDash and Instacart through Flutter overlays and push notifications.
- Deployed containerized backend services on **AWS EC2** with **Docker**, improving data retrieval latency by **40%** and supporting reliable syncing of logged offer and user activity data.
- Integrated **Firebase Authentication** and **Firestore** to support secure login, user profiles, admin analytics, and offer logging, and implemented hotzone mapping using logged GPS data.
- Set up **CI/CD** pipelines and reproducible build workflows with **GitHub Actions** improving build consistency and automating analysis and testing across development environments.

EaseResume | *MERN, Llama 3.1* Aug. – Sep. 2025

- Implemented an **AI** resume application platform by fine-tuning **Llama 3.1** to deliver personalized resume based on specific job descriptions.
- Utilized **ReactJS** for the website and **React Native** for the app, to meet broad range of users.
- Architected the backend infrastructure using **NodeJS, MongoDB** ensuring secure user authentication through **oAuth** and maintaining efficient performance.

Winnable | *MERN, Socket.io, oAuth* Jan. – Apr. 2024

- Developed a competition hosting platform using **React** and **Node,** enabling users to create lobbies, draft games, and set rules seamlessly.
- Integrated **Socket.io for** real-time communication and ensured secure user authentication with **oAuth**
- Utilized **MongoDB** for efficient data management, providing a robust and interactive user experience.

SoSy Scheduler | *Springboot, React* Jan. – Apr. 2024

- Developed a course planning platform for SoSy students @SFU, leveraging **ReactJS** for a responsive front end
- **Spring Boot** with **PSQL** for a robust backend, enabling independent registration, login, and personalized course scheduling, **REST API** to make and download the pdf of schedule.

Skills

Languages: JavaScript, Python, Java, SQL, Dart, Kotlin, C, C++, Golang
Frameworks & Libraries: React, Node.js, Express, Spring Boot, Flutter, React Native,
Cloud & DevOps: AWS, Docker, GitHub Actions, CI/CD, Firebase
Databases: PostgreSQL, MongoDB, Cloud Firestore
Tools: Git, GitLab, Jest, REST APIs, GraphQL, Tableau.
